

Elmiron

The Elmiron lawsuits claim that long-term exposure to Elmiron causes maculopathy, an eye disorder affecting the macula (central part of the retina) and a major cause of blindness.

Our law firm is representing individuals who took Elmiron and have suffered maculopathy or other serious eye damage.

The primary legal issue is whether the manufacturer of Elmiron failed to adequately warn doctors and patients about the potential vision-related side effects caused by Elmiron.

Criteria

- 3 months usage
- Vision loss or other vision issues or
- Diagnosis of Pigmentary Maculopathy
